Beam Clamp - IPTK

Product information

The Crosby IPTK beam lifting clamps are designed for transferring steel beams and attaching lifting tackle. Available with a fixed hoisting eye, without a hoisting eye, with a hinged hoisting eye or with a double locking device, the range accommodates different lifting arrangements. Multiple working load limits and jaw openings allow selection according to beam dimensions and lifting requirements.

Best used for:

- Transferring steel beams in industrial lifting and handling operations.
- Applications requiring different hoisting eye configurations and jaw openings.

Product benefits:

- Welded alloy steel body provides strength in a compact design.
- Multiple jaw openings and capacities support selection for different beam sizes.
- Individually proof tested to 2 times the WLL provides documented load verification.
- Individual serialization and included test certificates support traceability and inspection records.
- Available maintenance and repair kits support servicing and continued use
