Beam Clamp - IPTKW

Product information

The Crosby IPTKW series beam clamp is suitable for use as a temporary tackle eye for a beam and it is an economy version of the IPTK model.

Best used for:

- Lifting and transferring steel beams and structural profiles.
- Creating temporary lifting attachment points using suitable clamp configurations.

Product benefits:

- Welded alloy steel body provides strength in a compact design.
- Available in capacities of 2 thru 5 metric tons.
- Wide variety of jaw openings available: 75 to 350 mm.
- Individually proof tested to twice the WLL, with test certification included.
- Individual serialization and supplied documentation support inspection and traceability.
- Available maintenance and repair kits support ongoing servicing.
