

## Mini Trolley KITO TMH

### Product information

The KITO TMH Mini Trolley Series – The Small one with reduced Headroom

As an option to the electric chain hoist series ED/EDC KITO offers the reliable and very robust TMH Mini Trolley Series.

#### Product Advantages:

- Easy maintenance
- Light and compact design
- Better durability
- Smooth operation
- Reduced rolling resistance

#### Features:

- Heat-treated wheels are hardened for long life
- with adjustable spacers
- Integrated drop stops for fall protection of the trolley and the hoist from the beam-ends
- Maintenance-free sealed bearings protect against damage from dust and water

Specifically designed to work with the high-speed KITO ED hoist the TMH can be used for all single-fall models of the ED. Here the user can choose between a range of flange widths from 50 up to 100 mm. The user-friendly design provides for a headroom which has been improved by 25 % compared to hook mount\*
