Magnetic Lifter Ultralift TP

Product information

Manually operated Magnetic Lifter Ultralift TP specifically designed for lifting thin plate and removing single sheets from a stack. Ultralift TP can lift steel sheets with thicknesses as low as 5mm.
Ultralift TP has an in built safety button which locks the handle thereby preventing accidental release while a load is being held. Simply attach the Ultralift TP to the hook of your crane or hoist and you're ready to go. A job that takes two men with hooks, chains or slings can be done with one hand using the Ultralift TP. No more struggles to attach heavy or awkward loads. No more worries about the stability of the load once it's lifted.

Features:

- A lifting magnet designed for lifting thin plate safely
- WLL based on material thickness
- Guaranteed lifting of single plates
- Quick, safe, single face engagement with the load
- Built in safety features
- Can lift up to 400kg
- Two sizes in the range: TP150 and TP300.
- Larger plates can be lifted using two lifting magnets on a spreader beam
